**Stock Sliding Shoji Screens & Room Dividers
 MEASURING & ORDERING GUIDE**

The Screens you are about to order are intended to be attached to the ceiling or on an inside mount. Hardware is mounted to the top of the opening. A ceiling mount provides a finished, built-in look.

Use the opening depth table below to determine if your opening has enough unobstructed width.

- ❑ For an ceiling mount the opening you are going to cover needs to be a bit smaller than the accumulative size of the amount of doors you are going to use as each door needs to overlap on each other 3 1/2 inches when using a double track or more. (If you are installing two or more doors on a single track, disregard this and calculate for full opening as the doors would not overlap)
- ❑ If you are using these screens as an inside mount (eg the top of the OPENING not the Ceiling is where you plan to hang the door, please see the second table For Inside Mounting for regular passage doors.

Ceiling Mount (for 8' walls)

OPENING	24"x92.5" screen		30"x92.5" screen		32" x 92.5" screen		36" x 92.5" screen	
	Max Width	Required Height	Max Width	Required Height	Max. Width	Required Height	Max. Width	Required Height
1 screen	22"	96"	28"	96"	30"	96"	34"	96"
2 screens	42 1/2 "	96"	54 1/2"	96"	58 1/2"	96"	66 1/2"	96"
3 screens	63"	96"	81"	96"	87"	96"	99"	96"
4 screens	83 1/2"	96"	107 1/2"	96"	115 1/2"	96"	131 1/2 "	96"

- These widths include 3.5" overlap between each of the screens plus a 2" overlap at either side of the opening. Consideration is also given for approx. 1/4 " space at the bottom of the screen and the floor
